A novel probe for near field optical microscopy based on luminescent silicon, *Göttlich and Heckl* 61 (1995) 145
Gold-coated parabolic tapers for scanning near-field optical microscopy: fabrication and optimisation, *Garcia-Parajo, Tate and Chen* 61 (1995) 155

Comparison of mechanically drawn and protection layer chemically etched optical fiber tips, *Hoffmann, Dutoit and Salathé* 61 (1995) 165
Transmitted radiation through a subwavelength-sized tapered optical fiber tip, *Obermüller, Karrai, Kolb and Abstreiter* 61 (1995) 171
Thermal/optical effects in NSOM probes, *Yakobson, LaRosa, Hallen and Paesler* 61 (1995) 179
Laser heating of near-field tips, *Kurpas, Libenson and Martsinovsky* 61 (1995) 187
An optical tip–sample distance control for a scanning near-field optical microscope, *Kramer, Hartmann, Stadler and Guckenberger* 61 (1995) 191
Piezo-electric tuning fork tip–sample distance control for near field optical microscopes, *Karrai and Grober* 61 (1995) 197
Study of shear force technique for near-field microscopy with an uncoated fiber tip, *Vohnsen, Bozhevolnyi and Olesen* 61 (1995) 207
New design and imaging concepts in NSOM, *Lewis, Lieberman, Ben-Ami, Fish, Khachatryan, Ben-Ami and Shalom* 61 (1995) 215
Reflection near-field scanning optical microscopy: an interferometric approach, *Pilevar, Atia and Davis* 61 (1995) 233
Simultaneous reflection and transmission modes near-field scanning optical microscope, *Wei, Wei, Hsu and Fann* 61 (1995) 237
Investigations of liquid crystals and liquid ambients using near-field scanning optical microscopy, *Moyer, Kämmer, Walzer and Hietschold* 61 (1995) 291

Theoretical aspects of NFOM

Light confinement in scanning near-field optical microscopy, *Novotny, Pohl and Hecht* 61 (1995) 1
Reconstruction of the dielectric contrast profile from near-field data, *Carminati and Greffet* 61 (1995) 11
The inverse scanning tunneling near-field microscope (ISTOM) or tunnel scanning near-field optical microscope (TSNOM): 3D simulations and application to nano-sources, *Barchiesi and Van Labeke* 61 (1995) 17
Theory of electromagnetic energy transfer in three-dimensional structures, *Vigneron, Forati, André, Castiaux, Derycke and Dereux* 61 (1995) 21
Interference patterns in and outside a dielectric prism combined with a Fabry–Pérot cavity, *Castiaux, Dereux, Girard and Vigneron* 61 (1995) 29
Regularization in the macroscopic self-consistent model for near-field microscopy, *Bozhevolnaya, Bozhevolnyi and Berntsen* 61 (1995) 35
Relationship between the near-field speckle pattern and the statistical properties of a surface, *Greffet and Carminati* 61 (1995) 43
Near-field theoretical study of a magneto-optical grating, *Van Labeke, Vial and Barchiesi* 61 (1995) 51
Theory of Kerr effect in magnetic multilayered structures, *Forati, Dereux, Vigneron, Girard and Scheurer* 61 (1995) 57
The wave-mixing near field optics amplifier: a theoretical feasibility study for non-linear NFO experiments in biology, chemistry and materials science, *Zhao and Kopelman* 61 (1995) 69
Simple image-dipole method for photon scanning tunneling microscopy, *Jhe and Jang* 61 (1995) 81
Optical guidance of neutral atoms using evanescent waves in a cylindrical-core hollow fiber: theoretical approach, *Ito, Sakaki, Nakata, Jhe and Ohtsu* 61 (1995) 91
Laser heating of near-field tips, *Kurpas, Libenson and Martsinovsky* 61 (1995) 187
The dependence of the symmetry (spin) forbidden photoluminescence of C_{60} molecules on their proximity to metal, *Yurchenko, Burstein, Kazantseva, Romanow and Brard* 61 (1995) 259
